Dried Tagua Seeds: Our raw material

Muichic (moo.e.sheek) is fair trade, sustainable and organic jewelry designed in Vermont and ethically handmade in Colombia using Tagua seeds and other natural materials.

Using the Tagua seed as our raw material, we believe in fun, natural fashion, blending great design with eco-consciousness.

Tagua (tah.gwah) is a seed that grows wild in the rainforest of South America. After drying, it becomes rock solid resembling ivory in color, texture and hardness, hence its nickname: "vegetable ivory".

These dried seeds are dyed, cut, drilled, polished and turned into beautiful beads that become natural and organic jewelry for Muichic's natural collection.

More info at: muichic.com
