

muichic
natural jewelry

look book

Muichic (moo.e.sheek) is fair trade, sustainable and organic jewelry designed in Vermont and ethically handmade in Colombia from Tagua seeds and other natural materials.

Using the Tagua seed as our raw material, we believe in fun, natural fashion, blending design with eco-consciousness.

Tagua (tah.gwah) is a seed that grows wild in the rainforest of South America. After drying, it becomes rock solid resembling ivory in color, texture and hardness, hence its nickname: "vegetable ivory".

These dried seeds are dyed, cut, drilled and turned into beautiful beads that become organic jewelry for Muichic's natural collection.
